

ABSTRACT

The present invention comprises a synchronization
5 section for performing synchronization of an AV stream
and metadata, and a capsulization section for capsulizing
an AV stream and metadata every metadata unit, and by
reconfiguring metadata unit by unit and capsulizing an
AV stream by this means, makes possible partial execution
10 of metadata, and makes it possible to carry out program
distribution for processing a segment comprising part
of an AV stream, speeding up of response times, reduction
of the necessary storage capacity, and reduction of
network traffic.
